

Manufacturing

Emergency Notification System

Communicate Quickly

Having the ability to communicate quickly during an emergency increases employee safety and improves productivity in the manufacturing industry. Finding a system that is both easy to use and cost-effective allows senior management to save time and money while at the same time keeping employee's safety as a top priority. Because an Emergency Notification System allows one person to send a customized message to many people at once, management decisions can be made and quickly sent to all necessary shift workers.

Applications

Applications are numerous and include:

- Accident Reports
- Power Failure Notifications
- Inclement Weather Alerts
- Safety Drills
- Fire Evacuations
- Cancellations and Closings
- Employee Contact Validation Calls
- Meeting Notifications

Messaging Examples

The following actual messages from our manufacturing industry users demonstrate the various ways the emergency notification system can be utilized:

Fire

Emergency Evacuation for all those at the [REDACTED]! Fire! Fire! Please evacuate your building as quickly as possible! Report to your assigned evacuation assembly location. Do not re-enter any building until the all-clear has been called.

Inclement Weather Closing

Due to the current weather conditions, the plant is CLOSED today and Wednesday, February fourth. All three shifts are CANCELLED. We will resume operations Thursday, February fifth, at 7am---Weather Hotline [REDACTED].

Power Failure

Due to the ongoing blizzard, we are experiencing a major power failure, so 2nd and 3rd shift should not report in.

Stay on the Cutting Edge

The quicker messages can be sent during emergency situations results in employee safety and less time wasted and profit loss. By incorporating Message911's functionalities into your organization, you'll stay on the cutting edge of the manufacturing industry and improve your ability protect your employees, serve your customers, keeping your company profitable.

Testimonial

Message911 allowed us to improve our communications from about 50% of our employees getting a page request to 100% of our staff being notified when they were needed for response to fires and other hazardous conditions. This added value to our business continuity plan and was a must have.

Research

As a leader in the communication industry, Message911 keeps track of current industry trends and peer research in order to provide the most up-to-date and effective services for its clients.

About CallingPost Communications, Inc.

Message911 is an emergency communication solution of CallingPost Communications, Inc. -- a company that provides a cost-effective, fast, convenient and reliable way to quickly deliver important telephone messages.

Our company was founded in 1995 by Phil Alexander, a former engineer in the nuclear power industry, who in frustration diagrammed a simple telecom software solution to simplify his personal life. After pioneering the technology, Alexander donated the service to churches and non-profits, ultimately taking his invention to market, which eventually led to the birth of CallingPost Communications, Inc.

Today, CallingPost™ has expanded its product line to include customized and branded high-speed messaging solutions for emergency notification, business professionals and personal life management. Additionally, it has developed an exceptional fundraising solution for schools that enables educators to significantly offset the cost of school-to-home communication.

CallingPost messaging solutions are available in all areas of the United States, Canada and Puerto Rico.
